

NIZAMUDDIEN T I

Senior .NET & nopCommerce Developer

nizambajal@gmail.com | +91 7338348365 | Remote / Mangalore, India
linkedin.com/in/nizamuddien-ti | nopcommerce.com/en/nizamuddien-ti

PROFESSIONAL SUMMARY

Certified nopCommerce Developer and Senior .NET Engineer with 7+ years of experience designing and delivering scalable, high-performance enterprise applications. Proven track record across e-commerce, reporting systems, legacy modernisation, and Azure cloud integrations using .NET Core 6/7/8, Entity Framework Core, and nopCommerce. Deep expertise in plugin-based architecture, REST API design, Dependency Injection, SOLID principles, and CI/CD pipelines. Adept at leading remote teams, mentoring developers, and driving measurable performance improvements.

CAREER HIGHLIGHTS

- ▶ **Greenheck CAPS Migration:** Led end-to-end migration of a 20-year-old Delphi HVAC system to .NET Core + SQLite + EF Core — achieving 2,500+ Postman API test cases passing and a 50% reduction in computation time.
- ▶ **Report Engine:** Engineered a dynamic HTML-to-PDF/Word report generator (QuestPDF, IronPDF) cutting generation time by 70% ($\approx 12s \rightarrow 3.5s$), eliminating manual export for 5+ internal teams.
- ▶ **Azure AI Integration:** Integrated Azure OpenAI Foundry for intelligent text auto-suggestions with real-time ghost-text UX, reducing data entry time for end users.
- ▶ **Payment & Sync:** Designed real-time bidirectional CRUD sync between nopCommerce and Microsoft Dynamics 365 Dataverse via Web API, replacing a manual process and reducing sync latency from hours to near-real-time.
- ▶ **WebP Optimisation Plugin:** Built a configurable WebP serving plugin for nopCommerce, improving page load performance by 40%.
- ▶ **Dynamic Integration Tester:** Developed an internal test-generation framework that auto-creates performance, integration, and concurrency tests from API contracts, cutting QA setup time by $\sim 60\%$ per integration.
- ▶ **nopCommerce Plugin Suite:** Engineered reusable plugins for dynamic page creation, exception handling, data protection, and DST-aware timezone conversion — adopted across multiple client projects.

PROFESSIONAL EXPERIENCE

Senior Software Developer

PQube Business Solutions Pvt. Ltd. — Bangalore, India
(Remote/Hybrid)

Oct 2020 – Present

Clients: Greenheck (USA), ISSI (Consulting), PQube Internal Projects

Senior .NET developer across multiple concurrent projects, responsible for architecture, design, and full-stack implementation with emphasis on scalability, SOLID principles, and reusability.

Key Contributions

- ▶ **Dynamic Page Creator:** Built a runtime UI composition engine using nopCommerce TagHelpers and custom middleware, reducing new page delivery time by 50%.
- ▶ **Azure AI Foundry Integration:** Implemented intelligent ghost-text auto-suggestions using Azure OpenAI APIs, with graceful fallback and configurable debounce for production stability.
- ▶ **HTML Template Conversion Engine:** Designed a document export pipeline (QuestPDF + IronPDF + OpenXML) supporting PDF and Word output with pixel-accurate rendering. Authored a technical article on fixing HTML table rowspan issues in IronPDF — officially recognised and shared by IronSoftware on LinkedIn.
- ▶ **IronPDF Community Recognition:** Technical article “Fixing HTML Table Rowspan Issues in PDFs with IronPDF and C#” published on DEV Community and officially featured by IronSoftware — demonstrating deep expertise in HTML-to-PDF rendering, HtmlAgilityPack pre-processing, and custom font embedding in .NET.
- ▶ **DST-Aware Timezone Module:** Built a reusable timezone conversion library handling Daylight Saving Time edge cases across all client deployments.

- ▶ **Centralised Exception Middleware:** Created global exception handling with OpenTelemetry tracing and structured logging (AppInsights), enabling distributed trace correlation.
- ▶ **Microsoft Dynamics 365 Dataverse Sync:** Designed bidirectional CRUD integration using the D365 Web API with retry logic (Polly) and conflict resolution.
- ▶ **Dynamic Integration Tester:** Built an API-contract-driven test-generation framework producing Unit performance, integration, and concurrency tests automatically.
- ▶ **Reusable Bootstrap Modal Renderer:** Designed a server-driven modal system reducing frontend duplication across 10+ views.

Client Highlights

- ▶ **Greenheck (HVAC, USA):** Migrated Delphi CAPS to .NET Core 7 + SQLite + EF Core with COM exposure for legacy interop. Built FEI Boundary Calculator and an XML-to-PDF Reporting Engine. Validated 2,500+ Postman API test cases passing; 50% computation time reduction and a modern KVS system rebuild.
- ▶ **ISSI (Auditing & Consulting):** Improved reporting automation, data pipelines, and dashboards using custom nopCommerce modules; reduced manual reporting effort by approximately 40%.

Reporting Engine — Antenna House Formatter (AHF)

- ▶ **XML-to-PDF Document Pipeline:** Designed and built a document generation pipeline using Antenna House Formatter (AHF), transforming structured XML data into production-ready PDF outputs via XSL-FO stylesheets — replacing a legacy Delphi report renderer.
- ▶ **XSLT Transformation Layer:** Authored XSLT stylesheets to transform raw application XML into XSL-FO documents, enforcing consistent formatting standards, data accuracy, and layout compliance across all HVAC product report types (fan curves, performance sheets, submittal documents).
- ▶ **Macro-Driven Templates:** Built parameterised AHF macros for reusable document components (headers, footers, conditional sections, page numbering) — enabling non-developer template customisation and reducing per-report development time by 60%.
- ▶ **Batch & API Integration:** Integrated the AHF rendering engine with the .NET Core backend via API calls, supporting both on-demand single-document generation and batch processing of multiple report types from a single data source — validated with 2,500+ Postman API test cases.

Stack: .NET Core 6/7/8, C#, nopCommerce, EF Core, LinqToDb, SQL Server, SQLite, Azure, Azure DevOps, Bitbucket, Git, Jira, OpenTelemetry, JMeter, NUnit, Polly, QuestPDF, IronPDF, OpenXML, Antenna House Formatter (AHF), XSLT, XSL-FO, XML, Bootstrap, JavaScript, jQuery

Software Developer

Crescentic (Remote)

Feb 2019 – Oct 2020

Junior–mid level nopCommerce and .NET developer focused on API integrations, payment gateway implementation, and custom plugin development.

- ▶ Integrated PayPal, Stripe, and Authorize.Net payment gateways into nopCommerce, implementing tokenization and PCI-compliant processing flows across 3 client storefronts.
- ▶ Designed and built RESTful APIs enabling data synchronisation between nopCommerce, external databases, and third-party systems with robust validation and error-handling middleware.
- ▶ Developed custom nopCommerce plugins with cross-version compatibility, improving platform functionality for business-specific workflows.
- ▶ Established structured API and plugin documentation practices adopted as team standard, reducing onboarding time for new developers.

TECHNICAL SKILLS

Languages:	C#, ASP.NET Core, JavaScript, jQuery, PHP
Frameworks:	.NET 6/7/8, nopCommerce, Bootstrap, LINQ, EF Core, LinqToDb, DevExpress
Architecture:	SOLID, Dependency Injection, Plugin-based Architecture, REST API Design, Repository Pattern, Middleware Pipeline, CQRS
Databases:	SQL Server, MySQL, SQLite
Cloud & DevOps:	Azure, Azure OpenAI Foundry, Azure DevOps, Git, Bitbucket, Docker, CI/CD Pipelines, LLM Fine-tuning, OpenAI API
Reporting:	QuestPDF, IronPDF, OpenXML, Antenna House Formatter (AHF), XSLT, XSL-FO, XML, Excel VBA, DevExpress Reporting

Testing & Observability: nUnit, JMeter, OpenTelemetry, Serilog, Polly
Auth & Security: OAuth 2.0, JWT, Data Protection API, PCI-compliant integrations

PROFESSIONAL DEVELOPMENT

Building Customized LLMs with OpenAI — Columbia Engineering via Columbia Plus | LLM fine-tuning, prompt engineering, OpenAI API
Azure Cloud & DevOps — Questpond | Azure infrastructure, CI/CD pipelines, DevOps practices

PUBLICATIONS & RECOGNITION

Fixing HTML Table Rowspan Issues in PDFs with IronPDF and C#
DEV Community (dev.to) | Feb 2025 | Officially featured by IronSoftware on LinkedIn — recognised as a community contribution to the IronPDF ecosystem.
Article: dev.to/nizamuddien_ti/23261a78b/fixing-html-table-rowspan-issues-in-pdfs-with-ironpdf-and-c-4695 |

CERTIFICATIONS

Certified nopCommerce Developer — nopcommerce.com/en/nizamuddien-ti

EDUCATION

Bachelor of Computer Application (BCA)
Institute of Basic and Vocational Education — Mangalore, India
Diploma in Web Development (PHP & MySQL)
Turbosoft Computer Academy — Mangalore, India
Diploma in ASP.NET using C#
Manipal Institute of Computer Education — Mangalore, India

SOFT SKILLS

Technical Leadership · Remote Team Coordination · Mentoring & Code Review · Agile/Scrum · Architectural Design · Problem Solving · Stakeholder Communication · Continuous Learning
